

DAYTONA

ANIMA 190SYS ENGINE

Owner's Manual

ENGINE No. ANIMA190SYS: 3346580208-

DAYTONA corp.

INTRODUCTION

Thank you for purchasing of a ANIMA Engine.

This manual explains operation, inspection, basic maintenance of the engine.

If you have any questions, please contact the dealer you purchased the engine/bike from.

Please read this manual very carefully before use.

WARNING

1. ANIMA ENGINE is designed strictly FOR COMPETITION USE, ONLY ON A CLOSED COURSE. It is illegal to use this engine on any public road or highway. Off-road use on public space is also illegal.
Please check local regulation before use.
2. This engine is to be used by EXPERIENCED RIDERS ONLY.
Fatal accident may be caused unless it is used by experienced riders or maintained by professional and experienced mechanics.
3. This engine is to be maintained by professional and experienced mechanics.
Serious damage may occur, otherwise.
4. This manual explains ONLY THE BASIC operation, inspection and maintenance, but it is customer's responsibility to maintain the engine to the best possible performance, depending on the circumstances of the time.

CUSTOMER'S RESPONSIBILITY & CUSTOMER SERVICE

GENERAL EXCLUSIONS

Any failures caused by the following reasons are NOT considered as the defects of Products.

- (1) Overheating due to improper engine oil temp. control

WARNING

ENGINE OIL TEMPERATURE MUST BE CONTROLLED AT 90 DEGREES CELSIUS (194 DEGREES FAHRENHEIT) OR LOWER.

Serious damage will occur in the engine if engine oil temperature exceeds 90 degrees Celsius or 194 degrees Fahrenheit.

It is solely customer's responsibility to control the engine oil temperature.

- (2) Installation of parts or accessories that is not originally equipped on Products.
- (3) Abnormal strain, neglect, or abuse
- (4) Accident or collision damage
- (5) Modification to original parts
- (6) Lack of proper maintenance
- (7) Damage due to improper transportation or use

THE CUSTOMER'S RESPONSIBILITY

THE CUSTOMER'S RESPONSIBILITY shall be :

- (1) Operate and maintain Products as specified in the appropriate Owner's Manual
- (2) Prohibit the modification of the product

CUSTOMER SERVICE

If Products require services, you must take it to the authorized dealer, who is appointed by authorized local distributors of DAYTONA.

DAYTONA Corp. JAPAN is NOT in the position to take care of services of any kind with the customers or authorized dealers due to the contract with authorized local distributors.

PART NAMES

GENERAL SPECIFICATIONS

ENGINE	
Engine Weight (Dry)	21.5 kg
Engine type	Air Cooled 4-stroke SOHC
Cylinder arrangement	Single cylinder, Horizontally mounted
Displacement	189.9 cm ³
Bore × stroke	66.0 × 55.5mm
Compression ratio	12.0 : 1
Starting system	Kick (Kick pedal is NOT included in the Engine Kit) With Decompression System
Lubrication system	Wet sump
Recommended Engine Oil	SAE 10W - 40 or higher grade API "SG" or higher grade
Engine oil capacity	
Periodic oil change	0.60 L
With oil filter replacement	0.65 L
Total amount	0.70 L
	* Need more amount of oil when oil cooler is in use
Spark plug	
Type/manufacturer	ER9EH / NGK (resistance type)
Gap	0.6 ~ 0.7 mm (0.024 ~ 0.028 in)
Clutch type	Wet, Multi-plate 6-disc
Transmission	
Primary reduction system	Gear
Primary reduction ratio	67/18 (3.722)
Transmission type	4-Speed
Gear ratio	(Counter / Main)
1st	34/13 (2.6153)
2nd	26/15 (1.7333)
3rd	26/20 (1.3000)
4th	24/23 (1.0435)
GEAR SHIFT PATTERN	N-1-2-3-4
Electrical	
Ignition system	AC-CDI
Generator system	AC magneto

MAINTENANCE INTERVALS

Item	After running-in	Every race	Every 10h	Every 20h	As required	Remarks
ENGINE OIL Replace Inspect	●	●			●	
ENGINE VALVES Check the valve clearances Inspect Replace	●		● ●		●	The engine must be cold. Check the valve seats and valve stems for wear.
VALVE SPRINGS Inspect Replace			●		●	Check the free length and the tilt.
CAMSHAFTS Inspect Replace			●		●	Inspect the camshaft surface.
TIMING CHAIN SPROCKETS, TIMING CHAIN Inspect Replace			●		●	Check for wear on the teeth and for damage.
PISTON Inspect Clean Replace			●		● ● ●	Inspect crack Inspect carbon deposits and eliminate them.

MAINTENANCE INTERVALS

Item	After running-in	Every race	Every 10h	Every 20h	As required	Remarks
PISTON RING Inspect Replace			● ●		●	Check ring end gap
PISTON PIN Inspect Replace			●		●	
CYLINDER HEAD Inspect and clean Replace			●		●	Inspect carbon deposits and eliminate them. Change gasket
CYLINDER Inspect and clean Replace			●		●	Inspect score marks Inspect wear
CLUTCH Inspect and adjust Replace	●	●			●	Inspect housing, friction plate, clutch plate and spring
TRANSMISSION Inspect Replace				●	●	Inspect wear of gear and bearings
SHIFT FORK, SHIFT CAM, GUIDE BAR Inspect Replace				●	●	Inspect wear
ROTOR NUT Retighten	●			●		
CRANK Inspect and align				●	●	
CARBURETOR Inspect, adjust, clean	●	●				

MAINTENANCE INTERVALS

Item	After running-in	Every race	Every 10h	Every 20h	As required	Remarks
SPARK PLUG Inspect and clean Replace	●		●		●	
OIL COOLING SYSTEM(Option) Check hoses & leakage Replace hoses and gaskets	●	●			●	
AIR FILTER (Option) Clean and lubricate Replace	●	●			●	Use foam air-filter oil or equivalent oil
OIL FILTER Replace	●	●				
OIL STRAINER Clean				●		

PRE-OPERATION INSPECTION AND MAINTENANCE

Before riding for break-in operation, practice or a race, make sure the engine is in good operating condition.

Before using this engine, check the following points.

ENGINE OIL LEVEL INSPECTION

1. Start the engine, warm it up for several minutes, and then turn off the engine and wait for a few minutes.
2. Place the bike on a level place and hold it up on upright position.
3. Check the oil level through the sight glass.

Oil level should be between the upper and the central point of the sight glass.

4. Add oil to proper level

WARNING

Add oil as necessary, when install the oil cooler.

PRE-OPERATION INSPECTION AND MAINTENANCE

CARBURETOR SETTING

The carburetor is extremely sensitive to foreign matter (dirt, sand, water, etc.).

During installation, do not allow foreign matter to get into the carburetor.

Always handle the carburetor and its components carefully. Even slight scratches, bends or damage to carburetor parts may prevent the carburetor from functioning correctly.

Carefully perform all servicing with the appropriate tools and without applying excessive force.

After installing the carburetor, check that the throttle operates correctly and opens and closes smoothly.

It is highly recommended that the carburetor setting is performed by an experienced mechanic to obtain the best possible performance.

Atmospheric conditions and carburetor settings

Air Temp.	Humidity	Air Pressure (Altitude)	Mixture	Setting
High	High	Low (High)	Richer	Leaner
Low	Low	High (Low)	Leaner	Richer

The air density (i.e., concentration of oxygen in the air) determines the richness or leanness of the air/fuel mixture. Therefore, refer to the above table for mixture settings.

That is:

- Higher temperature expands the air with its resultant reduced density.
- Higher humidity reduces the amount of oxygen in the air by so much of the water vapor in the same air.
- Lower atmospheric pressure (at a high altitude) reduces the density of the air.

PRE-OPERATION INSPECTION AND MAINTENANCE

Effects of the setting parts on the throttle valve opening

Here is the recommended setting information of TK MV33-1F and PE28 carburetor, for your reference.

Tested Conditions

Carburetor	TK MV33-1F (DT#88600)
Air Temperature	35 degrees Celsius
Humidity	50%
Atmospheric Pressure	1003 hPa
with UNI Air Filter (#UP-4200ST)	
Fuel	Octane#100

Item	Recommendation
Main Jet	#129
Slow Jet	#38
Main No	ϕ 2.600
Jet Needle	5A11 Clip position : In the 5 th groove from the top
Pilot screw	2 return

PRE-OPERATION INSPECTION AND MAINTENANCE

Carburetor	KEIHIN PE28 (DT#85707)
Air Temperature	20 degrees Celsius
Humidity	50%
Atmospheric Pressure	1000 hPa
with UNI Air Filter (#UP-4200ST)	
Fuel	Octane#100

Item	Recommendation
Main Jet	#122 (DT#87004)
Slow Jet	#38 (DT#89672)
Throttle Valve	#3.0 (Original of DT#85707)
Jet Needle	#65414 / 46JFQ (-2 / ϕ 2.505) or 46JFN : Original of KEIHIN PE28 (DT#85707) Clip position : In the 2 nd or 3 rd groove from the top
Air screw	2 return

PRE-OPERATION INSPECTION AND MAINTENANCE

ENGINE OIL TEMPERATURE CONTROL

WARNING

Engine oil temperature is to be strictly controlled at 90 degrees Celsius (194 degrees Fahrenheit) or lower.

Serious damage will occur in the engine if engine oil temperature exceeds 90 degrees Celsius or 194 degrees Fahrenheit.

It is solely customer's responsibility to control the engine oil temperature.

Any failures caused by overheating are NOT considered as the defects of Products.

It is highly recommended to use HIGH-EFFICIENT OIL COOLER and OIL TEMPERATURE GAUGE to protect the engine.

The above OIL COOLER is just a recommendation.

Engine oil temperature can be heated up over 90 degrees Celsius or 194 degrees Fahrenheit, even if the above recommended OIL COOLER is used.

Again, customer needs to control the oil temperature very carefully.

TIGHTENING TORQUE

Standard

Size	Tightening Torque N.m (kgf.m)	Size	Tightening Torque N.m (kgf.m)
5mm Bolt, Nut	5.2 (0.5)	5mm Screw	4.2 (0.4)
6mm Bolt, Nut	10 (1.0)	6mm Screw	9.0 (0.9)
8mm Bolt, Nut	22 (2.2)	6mm Screw (Small Flange)	10 (1.0)
10mm Bolt, Nut	34 (3.5)	6mm Screw (Large Flange)	12 (1.2)
12mm Bolt, Nut	54 (5.5)	8mm Flange Bolt, Nut	27 (2.8)
		10mm Flange Bolt, Nut	39 (4.0)

Others

Nut M8, Cylinder Head : 22N.m (2.2kgf.m)

Nut M14, Clutch center and Primary Gear : 44N.m (4.5kgf.m)

Nut M12, Magnet Rotor : 59N.m (6.0kgf.m)

Bolt M12, Oil Drain : 24N.m (2.4kgf.m)
